

# Penreach

## About Shalamuka Science Centre

The Penreach Shalamuka Science Centre is based in Mpumalanga (R40 road from Nelspruit to White River) working towards educational excellence in disadvantaged communities.

Our goals include;

- Promoting Science & Technology literacy among young people and the general public.
- Contributing to the enhancement of learner participation and performance in science, technology, engineering and mathematics (STEM).
- Identifying and nurture youth talent and potential in STEM.
- Providing future focused career education in STEM-based discipline.

Penreach does this through partnerships with National and provincial departments, DSI through SAASTA and is a member of Southern African Association of Science and Technology Centres (SAASTEC).

From the outset, the science centre was intended as a community asset, with Penreach as the custodian to ensure that the broader community benefits from the activities that take place within or as a result of the centre.
